

## Organisation

Enthusiastic people who get space, get bright ideas and drive the company forward". This philosophy is characteristic for MECAL and offers possibilities for people who have an entrepreneurial spirit and desire for (personal) development.

Working as a Project Engineer at MECAL, means participating in an open and pleasant working environment in an internationally oriented engineering company. Up to now more than 130 professionals have made the choice for MECAL, for our technical innovations and informal culture with short communication lines.

For our office in Enschede, for our Business Unit Semicon Turn Key Solutions we are looking for:

## Project Engineer

### Responsibilities

- Preparing analyses or executing designs based on customer requirements
- Undertaking an active role in the design process of primarily Machine Support Frames (MSF's)
- Presenting reports, both verbally and in writing, to both the respective customer and Business Unit Manager

### Requirements

- BSc or MSc-degree working experience in Mechanical Engineering, Electronics or (Technical) Physics
- Knowledge of 3D, AutoCad, FEM and/or control techniques, MS Office
- Preferred: Equivalent working experience in design teams

### Profile

- Capable of linking theory with practice
- Creative, solution-oriented and commercial mind-set
- Capable of working both independently and in a team
- Pro-active and assertive approach
- Excellent expression skills, especially in English, both verbally and in writing
- Design-oriented with eye for detail
